U DENTAL PATIENT INFO: EMPOWERING YOU TOO MAKE INFORMED DECISION

A beautiful way to replace missing teeth and beautify tooth colour, size, length and angulation.

The Clip-on Smile™ can change your smile in one second, simply "clipping on" over the teeth.

It is a quick, easy and affordable alternative. It's the NO cutting of teeth, NO injections & NO adhesives approach to many restorative and cosmetic treatment. It is Non-invasive, reversible and removable if you do not feel like wearing it.

All in just two 30-minute appointments.

How can I make use of this?

Clip-on Smile™ is a comfortable, removable dental appliance.

It is the ideal solution for solving a wide variety of short- and long-term clinical problems:

- Replacing one or more missing teeth
- To beautify front teeth

To change colour

Longer and slender teeth

More balance and even teeth size, shape and angulation.

To hide gaps between teeth

- Temporary denture for implant treatment
- Splint to hold slight shaking teeth
- Diagnostic trial when waiting for final porcelain crown/bridge

Removable partial dentures for any no-teeth area.

Establishing vertical height before starting full-mouth reconstruction

Night guard for teeth clenching to protect the teeth from heavy bite.

Provide support for sunken lips and cheek.

Process:

First Visit: Take 2 mould. Choose colour and shade
Register biting position

Second Visit about 1-2 weeks later:

Try the Clip-on Smile, adjust gum margin.

Exercise to put in:

When inserting the appliance, establish the correct path of putting in.

Always use both hands starting at the posteriors, applying pressure until seated completely

After few minutes of acclimating to the appliance, adjustment may be necessary

Review visit(optional): adjustment made if any problem

Cost:

RM550 to 1350 per jaw depends on the design, number of teeth and materials used.

Limitations:

There are some circumstances in which a patient should not use the Clip-on Smile™

- Severe gum problems with multiple shaky teeth which cannot provide support
- Completely no teeth
- Front teeth too out

If you need more information, please consult your dentist.
